Today, more than 80% of the electricity comes from clean sources in Canada, and the country has tested new energy storage technologies to integrate wind and solar power more

While there are nearly 50 energy storage projects currently listed within the Alberta Electric System Operator (AESO)'s projects list, the development of a 600MW portfolio of five solar

Connect with e-STORAGE experts and explore innovative turnkey energy storage solutions that redefine the way you store and manage energy. e-STORAGE is a brand of Canadian Solar, Inc., providing

Read the agenda-setting paper, "Laying the Foundation: Six priorities for supporting the decarbonization of Canada's electricity grid with energy storage," to learn more about CanREA's perspective on what

BESS is the fastest growing energy storage technology in Canada and is also the dominant storage technology in terms of capacity and number of sites. All but four projects proposed

Recurrent Energy is one of the world's largest and most geographically diversified utility-scale solar and energy storage project development, ownership and operations platforms.

Under the agreement, e-STORAGE will supply approximately 500 SolBank 3.0 containers. The battery cells used in the system will be manufactured by Canadian Solar through its

Energy Storage Canada is the only national voice for energy storage in Canada today. We focus exclusively on energy storage and speak for the entire industry because we represent the full value

In addition to updated project information, the map includes a new battery energy storage layer, Indigenous renewable energy layer, and a solar energy potential layer.

Energy storage configuration for Canadian solar projects

Through our innovative solutions, we aim to optimize grid operations, promote clean energy integration, and foster a more resilient and sustainable energy landscape.
