JIS R3106 stipulates methods for measuring and calculating visible transmittance, visible reflectance, solar transmittance, solar reflectance, and normal emittance as indices for expressing the properties

The MyBroadband Speed Test tool is the best way to test your South African Internet connection.

We evaluated NIR spectroscopy as a method to measure the reflection of materials used in photovoltaic panels (modules). A manufacturer of thin film photovoltaic panels requested NIR reflectivity analysis

To perform these types of reflectance measurements, a high-performance UV-Vis-NIR spectrophotometer equipped with integrating sphere is required. An integrating sphere is designed to

The MyBroadband Speed Test app is the best way to measure your Internet speed accurately.

Reflectivity, durability and cost are the major parameters considered during the performance testing of the reflector material.

Light reflected from the surface of solar panels can have important environmental effects. Using 2 measurement methods, spectrum analysis and intensity measurement, the optical

The MyBroadband Speed Test app is trusted by thousands of South Africans ? and for good reason.

How to test your Internet speeds The best way to test your South African Internet connection is with the MyBroadband Speed Test app, which is available for free on Android, Huawei,

Reflectance curves (in arbitrary units) of 5-in. x 5-in. wafers taken with the PV-Reflectometer. These

How to test the reflectivity of photovoltaic panels

data yield information on the surface roughness, texture height, and oxide and

O Teste de internet - Internet Speed Test Minha Conexão - é um teste de velocidade desenvolvido para que você possa medir o desempenho da conexão de internet contratada.

The MyBroadband Speed Test App is the best way to ensure you're getting the speeds your ISP promised.
