The BMS might be invisible to drivers, but it's the unsung hero of the EV revolution. As battery densities increase and charging speeds accelerate, having a smart, adaptable management system isn't

The future of the battery energy storage market in Thailand is intrinsically linked to clean energy deployment and electrification trends. As the country accelerates toward net-zero

This company in Thailand focuses on making lithium-ion battery-based energy storage systems that are very flexible, because they can be used from homes, businesses, to large industries.

As the global transition towards renewable energy and smart grids accelerates, ensuring the safety and efficiency of energy storage has never been more critical. To meet this surging

The 2026 ASEAN Smart Energy & Energy Storage Exhibition (ASEE) opened on March 25 at the Impact Exhibition Center in Bangkok, Thailand, running through March 27. DALY New Energy attended with

In this article, we explore the critical role of the battery thermal management system (BMS) in new energy vehicles, focusing on its principles, key technologies, existing challenges, and

Third-party organizations are welcome to join the Phoenix EV task force to develop new parts and instruments to improve EV for local use. We are excited to announce our brand-new Battery

The Asia Pacific (APAC) region is experiencing a profound transformation in its New Energy Vehicle (NEV) Battery Management System (BMS) landscape, driven by the integration of

Without a BMS, an EV battery could become unsafe, degrade quickly, or even cause fires due to uncontrolled electrical activity. Managing high-capacity lithium-ion batteries

Thailand new energy bms battery

As the global shift toward clean energy accelerates, Thailand is emerging as a key player in the lithium-ion battery market, driven by its strategic position in Southeast Asia's electric vehicle (EV) and
